FOR IMMEDIATE RELEASE  
November 2003

**NETAFIM CONTINUES TO LEAD THE WAY IN DRIPPER  
TECHNOLOGY WITH THE INTRODUCTION OF  
TECHLINE CV™  
The Next Generation Dripperline is Here**

**Fresno, CA** – Netafim USA, the industry-leading manufacturer of micro-irrigation systems has introduced the next generation of dripperline – Techline CV. Developed for their Landscape and Turf Division, Techline CV features the proven-performance you’ve come to expect from Techline, plus the most advanced dripperline technology available today. The dripper is designed with a check valve (CV) that turns the drippers on and off with system operation. This minimizes water loss, eliminates low slope drainage and most importantly, provides more precise watering. “Contractors and Architects recognize the value and importance of check valves in sprinklers, now Techline CV offers them an even better choice in watering with features that are required for maximum watering efficiency,” said Mike Stoll, Market Segment Leader, Netafim USA Landscape and Turf Division. He added, “Netafim is proud to say Techline CV dripperline is the only low volume irrigation product available on the market with all the features to save water and maximize landscape appearance.”

Additional technological advancements include:

- Built-in Physical Root Barrier - each dripper is designed with a built-in physical root barrier providing protection from root intrusion.
- Available with 0.26, 0.4, 0.6 and 0.9 GPH flow rates – the new 0.26 GPH flow rate performs well on clay or clay loam soil. The new 0.26 GPH flow rate makes Netafim USA the only manufacturer to offer the ability of the designer to perfectly match dripperline applications to soil absorption rates for maximum watering efficiency.

“We are very excited to demonstrate Netafim’s technological leadership with the introduction of the most advanced dripper technology in the industry,” said Mike Stoll. He said, “Netafim is committed to bringing our customers the most advanced products, technology and application expertise available on the market.”

Awarded **ISO 9002 Certification** by the International Organization for Standardization - Netafim USA is the largest growing division of the Netafim International Group, the pioneer of micro-irrigation technology. With over 38 years in the irrigation industry and global expertise in more than 80 countries, Netafim offers a full-line of products for a variety of markets including agriculture, landscape, greenhouse, nursery, mining and wastewater. Netafim USA is headquartered in Fresno, California.
